1 Test Reports

Test case id	Description	Expected result	Actual Result
TC-1	Add product to system.	System shows success message and product is visible in the overview.	Pass
TC-2	Edit existing product.	System shows success message.	Pass (Product also changes in overview)
TC-3	Remove a product.	System shows success message.	Pass (Product also disappears from overview)
TC-4	Add Employee to shift	User should be able to see in the main schedule form that John is now in Monday morning. And in the Make Schedule screen, in the log view that the system did the action.	Fail: There is no one scheduled on Monday morning.

Test case id	Description	Expected result	Actual Result
TC-5	Remove Employee from shift	When removed the system shows in the log view that it happened. John is no longer shown on the main screen	Fail: There is no person to be removed.
TC-6	User able to switch to schedule section	When the User goes to the schedule section the form will change	Pass
TC-7	Login	User is able to open HR Manager Home tab and have HR Manager privileges	Pass
TC-8	Logout	User is able to logout from his account and return to the Login tab	Pass
TC-9	Administrator / HR Manager can add a user	System shows success message and user is visible in the overview.	Fail: It is not possible to fill in all the fields and press the button because of the interface size.
TC-10	All Managers / Administrators should be able to see information's about each employee.	System brings data related to selected employee.	Pass
TC-11	All Manager / Administrator should be able to navigate through pages in employee's list.	System brings next page.	Pass

TC-12	All Managers / Administrators should be able to skip through pages in employee's list.	System goes to the last page of the list of employees	Fail: I can't go to the last page of the employee.
TC-13	Manager / Administrator should be able to sort the list of employees	System shows all employees sorted by their name or ID	Pass
TC-14	All Managers / Administrators should be able to search for an employee	System brings up the name of the employee that was searched for.	Fail: when I sorted it by name and searched it shows me Ahmed 6 only but show me Adel 2 with sorting with ID.

Table 1. Test cases

2 Recommendations

Test case	Recommendation
TC-1	When entering a value with decimals like stated in the test plan, "8.5" for example, it will delete the point and change it to 85. This does not happen when you enter "8,5" try to check this.
TC-2	Same thing as for TC-1.
TC-3	-
TC-4	There is no way to go to the make schedule section.
TC-5	I didn't see any person and the remove button.
TC-6	-
TC-7	-
TC-8	-
TC-9	Fix the interface size, I tried both window and fullscreen. The "Add" button is not visible at all.
TC-10	-
TC-11	-
TC-12	The size of the form is the issue. I can't go to the next page.
TC-13	When Changing to a different list of employees make the button clear for the user because it is so close to each other and for the first time user I was changing from the first bag to the last page.
TC-14	When searching for Adel it will be better if you could be able to search by partial names and shows a list of the matched results instead of showing one employee.
