Notes

Need to think about who is in charge of the attendance. FR-11 might not be what the costumer would like.

Sales representative should not be able to sell products. This should be left to the cashiers. Make sure you clarify with customer later.

In functional requirements look at using constraints.

"Preparing requests" is vague and might need to be changed or deleted. It is probably already covered in different functional requirements.

Look at the numbering of the extensions, some are not connected to the right MSS.

Focus on implementing employee and product for now and later on schedules.

Try to add another class connected with the schedule manager (in UML).

Try to divide the work feature based. We will talk about this some more on Thursday.
